

2 dozen challenge for 2014-2015

As in previous years this will be a simple knock out competition with the pairings being determined by chance. (Your names are drawn from a bowl)

To begin in November.

You are to shoot 2 dozen arrows at a 60cm target from 20yds using 10 zone scoring.

This can be shot as a stand alone round or as the first 2 dozen of a longer round. After the normal 6 sighters.

Immediately before shooting this challenge you must declare clearly to the other archers present that you are shooting your challenge round. That round will then stand, you can not abandon it and shoot again later.

”Please clearly mark your score sheet as “2 dozen challenge

Only 1 attempt at this challenge is permitted in each month and must be shot during the month

Your score is to be added to your allowance to make your total.

Allowances are based on your current indoor handicap. (A considerable number of archers do not have a current indoor handicap, for these people I have used current outdoor handicaps or recent score handicaps. Where I had no clues as to current performance I assigned a starting allowance of 80.) These allowances will change between each round of the challenge, with a new allowance being the average of your assigned allowance and the allowance for the score you shot. This means allowances can go up as well as down.

I will publish a summary of the scores achieved and the new pairings as soon as possible after the last day of each month.

I will put the pairings chart, rules etc on the wall in the indoor range.

Contact me if you require any clarification.
